

8 June 2019

P.E.

All Year 3 children need to bring their PE kit in on a Monday and keep it in school until the Friday.

Children should wear black shorts/tracksuit bottoms, white t-shirt and trainers/plimsols.

Please ensure that they bring their kit with them on these days as a kit is an essential part of the lesson, in terms of safety and hygiene.

Please write your child's name on every item of clothing to avoid losses.

Clubs

A great variety of sports and academic clubs are offered to children in KS2. All children are encouraged to participate as fully as possible to help them enjoy their time at school even more.

Keep an eye out for club letters and return them promptly to avoid disappointment.

Year Three Newsletter

Final push towards the end of the year

We hope you and your children had a lovely half term break. During this half term we often see huge strides made by children and we are sure that this year will be no exception. One final push towards the summer!

Whole School Careers Project

For our whole school project this term, the children will be focusing on careers and responsibility.

In Year 3, we will be thinking about recycling and the environment and will be turning 'trash to treasure'.

The children will design and create toys out of recycled materials and then take part in an Apprentice-style competition to see who has the most marketable product.

Home Learning Journals

Please take the time to read with your children and sign their home learning journals with a comment. Reading at home makes a huge difference to the quality of children's learning now and in the future.

Global Gardens

Living things have certain requirements in order to grow and stay healthy.

In **English, Science** and **Geography**, we will be investigating Global Gardens this half term as our unit of learning.

This will involve school trips to the park and gardening in school so that the children can get to grips with living things.

In science we will investigate how and why plants grow, what helps and hinders them when growing and environmental issues around plants and their effects on human beings.

To support your child's learning, we encourage you to discuss the facts they are learning in school. Of course, we always encourage any extra learning at home. If you have any information or knowledge of plants or garden and how they grow, please send in a fact file.

Trash to treasure

If you have any plastic containers, bottles or any other recycling that could be useful for our careers project then please send it in to school with your child. Thank you!
